## Office of Institutional Compliance

April 11, 2016

Fred Martin  
Computer Science

**IRB Protocol #:** 16-061

**Study Status:** Exempt

**Exempt Category:** 45 CFR 46.101(2)

**Protocol Title:** WebSlicer Usability Testing

**Approval Date:** 4/11/2016

This is to advise you that the above referenced protocol has been reviewed and approved as meeting the Exempt Status Determination, on the date and category as noted above, by the Institutional Review Board. No further action is required by you unless there is a change in the research that changes the exempt status determination.

It is your responsibility to consult with and notify the IRB of such a change and take appropriate actions, which may include submitting an application for review under the expedited or full review process. Exempt status projects are closed out one year from the approval date by the IRB Administrator. If changes to an approved exempt project do not result in a change in the review determination, additional forms do not need to be filed with the IRB.

For up-to-date forms and information go to [www.uml.edu/Research/OIC/](http://www.uml.edu/Research/OIC/)
